

## CC1-19

Application Fields: General Food Equipment & Refrigeration • Heating, Ventilation & Air-Conditioning • Mechanical Engineering

### Description

Another version of the 2" vapor replacement, this thermometer features the same adjustable calibration, ten second update time and wide ambient operating temperature range with an internal battery power source. Perfect for tamper proof and simple applications.

### Specifications

- NSF Listed
- Replaceable Battery
- ABS plastic case
- 2.45" x 1.15" x 0.74"
- LCD display
- Thermometer accuracy is +/-1° of range
  - Change from Fahrenheit to Celsius via an optional switch on the back of the unit
- Refresh time of 10 seconds
- Maximum cable length of 196"
- Temperature range of -58° to 158° F (-50° to 70° C)
- Operational temperature range of -4° to 122° F
- Optional plug-in connection with 1.5" cable on unit side and up to 900" on the probe side for ease of installation
- Waterproof
