

CC1-21

Application Fields: Walk-In Coolers or Freezers • Hot or Cold Display Cases • General Food Equipment

Description

Another version of the 2" vapor replacement, this thermometer features the same adjustable calibration, ten second update time and wide ambient operating temperature range with a replaceable battery power source. Perfect for low light applications and where cost reductions are necessary.

Specifications

- NSF Listed
- Easily Customizable with your logo
- Battery powered
- Replaceable Battery
- SUS 304 case with white dial and polycarbonate lens
- 2" diameter and 1.18" depth
- LCD display
- Thermometer accuracy is +/-1°C
- Refresh time of 10 seconds
- Maximum cable length of 196"
- Temperature range of -58° to 230°F (-50° to 110° C)
 - Change from Fahrenheit to Celsius via an optional switch on the back of the unit
- Operational temperature range of -4° to 122°F
- Waterproof
